Fast Action ROUNDUP® XL Ready to Use Weedkiller

Roundup XL Weedkiller is absorbed by leaves and moves through the entire plant, above and below ground, to destroy nettles, ground elder, brambles, bracken and other tough and woody weeds. It is inactivated on contact with the soil and is then broken down by soil micro-organisms, to allow replanting. **KEEP CHILDREN AND PETS OUT OF TREATED AREAS UNTIL DRY.**

Instructions for Use

<p>WHEN TO USE</p> <ul style="list-style-type: none"> • Spray at any time when the weeds are actively growing and have adequate leaf area to absorb the spray. • Treat established perennial weeds at the start of flowering to give best results. • Rain within 6 hours of spraying reduces effectiveness and repeat treatment may be necessary. • Apply in calm conditions to avoid drift onto cultivated plants. • Spray nettles and ground elder when new leaves have unfolded fully in late spring. 	<p>WHERE TO USE</p> <ul style="list-style-type: none"> • Controls most Perennial, Tough and Deep Rooted and woody weeds around the garden. • Especially for controlling unwanted vegetation and clearing areas for planting. <p>DO NOT USE ON LAWNS OR OTHER WANTED PLANTS, UNLESS YOU WANT TO KILL THEM.</p> <p>This product is a home garden weedkiller for use on unwanted vegetation. It contains 7.2 g/L glyphosate acid (present as 9.7 g/L isopropylamine salt of glyphosate)</p>	<p>HOW TO USE</p> <p><i>Although not a requirement, as good practice, we recommend wearing waterproof gloves and gardening footwear</i></p> <ul style="list-style-type: none"> • Rotate nozzle to "spray" or "stream", hold sprayer approx 50cm from the target weed to lightly wet the leaves and avoid run-off. • Rotate nozzle to "stop" after use. <p>TO OPEN</p> <ol style="list-style-type: none"> 1. Push the security tab until it breaks from the trigger 2. Turn nozzle to begin spraying.
--	--	--

- Treat established perennial weeds at the start of flowering to give best results.
- Spray nettles and ground elder when new leaves have unfolded fully in late spring.
- Weeds may show first effects from a few days up to 4 weeks, depending on the weather and the type of weed.
- Where weeds are to be removed, allow 7 days after spraying before digging or soil cultivation, to allow time for the weedkiller to move to the roots.
- Repeat application if necessary, should new growth appear.

GUIDANCE FOR BEST RESULTS

Nettles	June-September
Thistle	June-July or at flowering
Bindweed,	June-August or at flowering
Bracken	
Brambles & other woody weeds	June-September
